Both the Governor and Mrs. Mann are in excellent health. Governor Mann made a careful study ever since the meeting a month ago,

work upon the drafting of this measure over since the meeting a month ago, when the Annexation Committee decided definitely upon the plan it would from the Council.

Chalrman Powers has called a meeting at the Governor, but the material is at hand and in many instances the roads at aday of eight hours, while Virginia convicts put in a workday of ten hours at an expense of 53 cents a man. Interest centres chiefly about the form of reference. The committee has the authority to report the measure to either branch, and, since the chairman, Mr. Powers, is a member of the Board of Aldermen, it would be appropriate that it be sent to the board at its next meeting on September 9. To this plan, it is understood, there is considerable opposition, and the outlook now is that the ordinance will be referred first to the Common Council. That body meets on October 6.

In City Hall circles it is commonly predicted that the measure will be passed by both branches without marked opposition. The attack in the lower branch will be led by Councilman Umlauf, who served notice, when the annexation committee adopted its final plan, that he reserved the right to file a minority report when the measure

had much trouble to enforcing the speed regulations. It was found that a fine did not stop the evil. The amount of the fine is left to the discretion of the magistrate, and he is permitted to send the offender to jail. It is seidom that this course is taken, but Henrico authorities are determined to ask for this punishment in all aggravated cases in the future.
